ULTRASONIC SCALER

NSK Offers
A Wide Range of
VARIOS Ultrasonic Scaler Tips
For Clinical Applications.

Washable in the thermodisinfector

Autoclavable up to 135°C

Varios2 / Varios tips

NSK tips fit Varios and Varios2 ultrasonic scaler handpieces as well as Satelec® ultrasonic scaler handpieces.

NSK make a number of tips which will fit on EMS® ultrasonic scaler handpieces.

The following is a guide to illustrate all NSK Varios tips, their applications and connectivity.

NSK scaler tips

NSK V-Tip System

Tips marked with the and icon can be directly attached to both NSK Varios and Satelec® ultrasonic scaler handpieces.

Satelec® Ultrasonic Scaler Handpieces

EMS® Ultrasonic Scaler Handpieces

The key points for correct usage of the ultrasonic scaler

Tartar is removed efficiently by ultrasonic vibrations and the cavitation effect of the NSK ultrasonic scaler. In addition to the elimination and destruction of bacterial biofilms. Here are the "four points" for maximizing the effects:

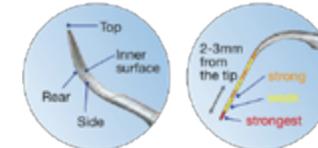

1 Correct application of the tip to a tooth

NSK ultrasonic scaler series is Piezo type, with a tip that has a linear, reciprocating motion.

The tip generates varying amounts of power according to the part of the tip that is applied to the tooth.

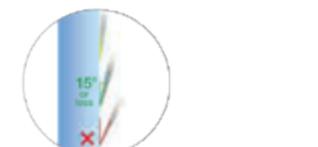

The impact on the tooth surface and the results will vary depending on which part of the tip is applied to the tooth.

Typically, applying the side of the tip 2~3 mm from the end can be most effective.

2 The angle of the tip

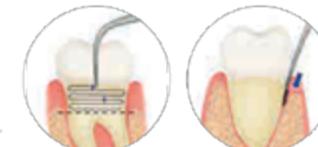

By positioning the tip at an angle of 15 degrees or less against the tooth surface, the side of the tip can be applied 2~3 mm from the end. The greater the angle of the tip against the tooth surface, the greater the impact on the tooth becomes since the end of the tip (which is the most powerful part of the tip) is applied to the tooth. Consequently leads to sensitivity on the tooth and discomfort for the patient.

3 Application and the motion of the tip

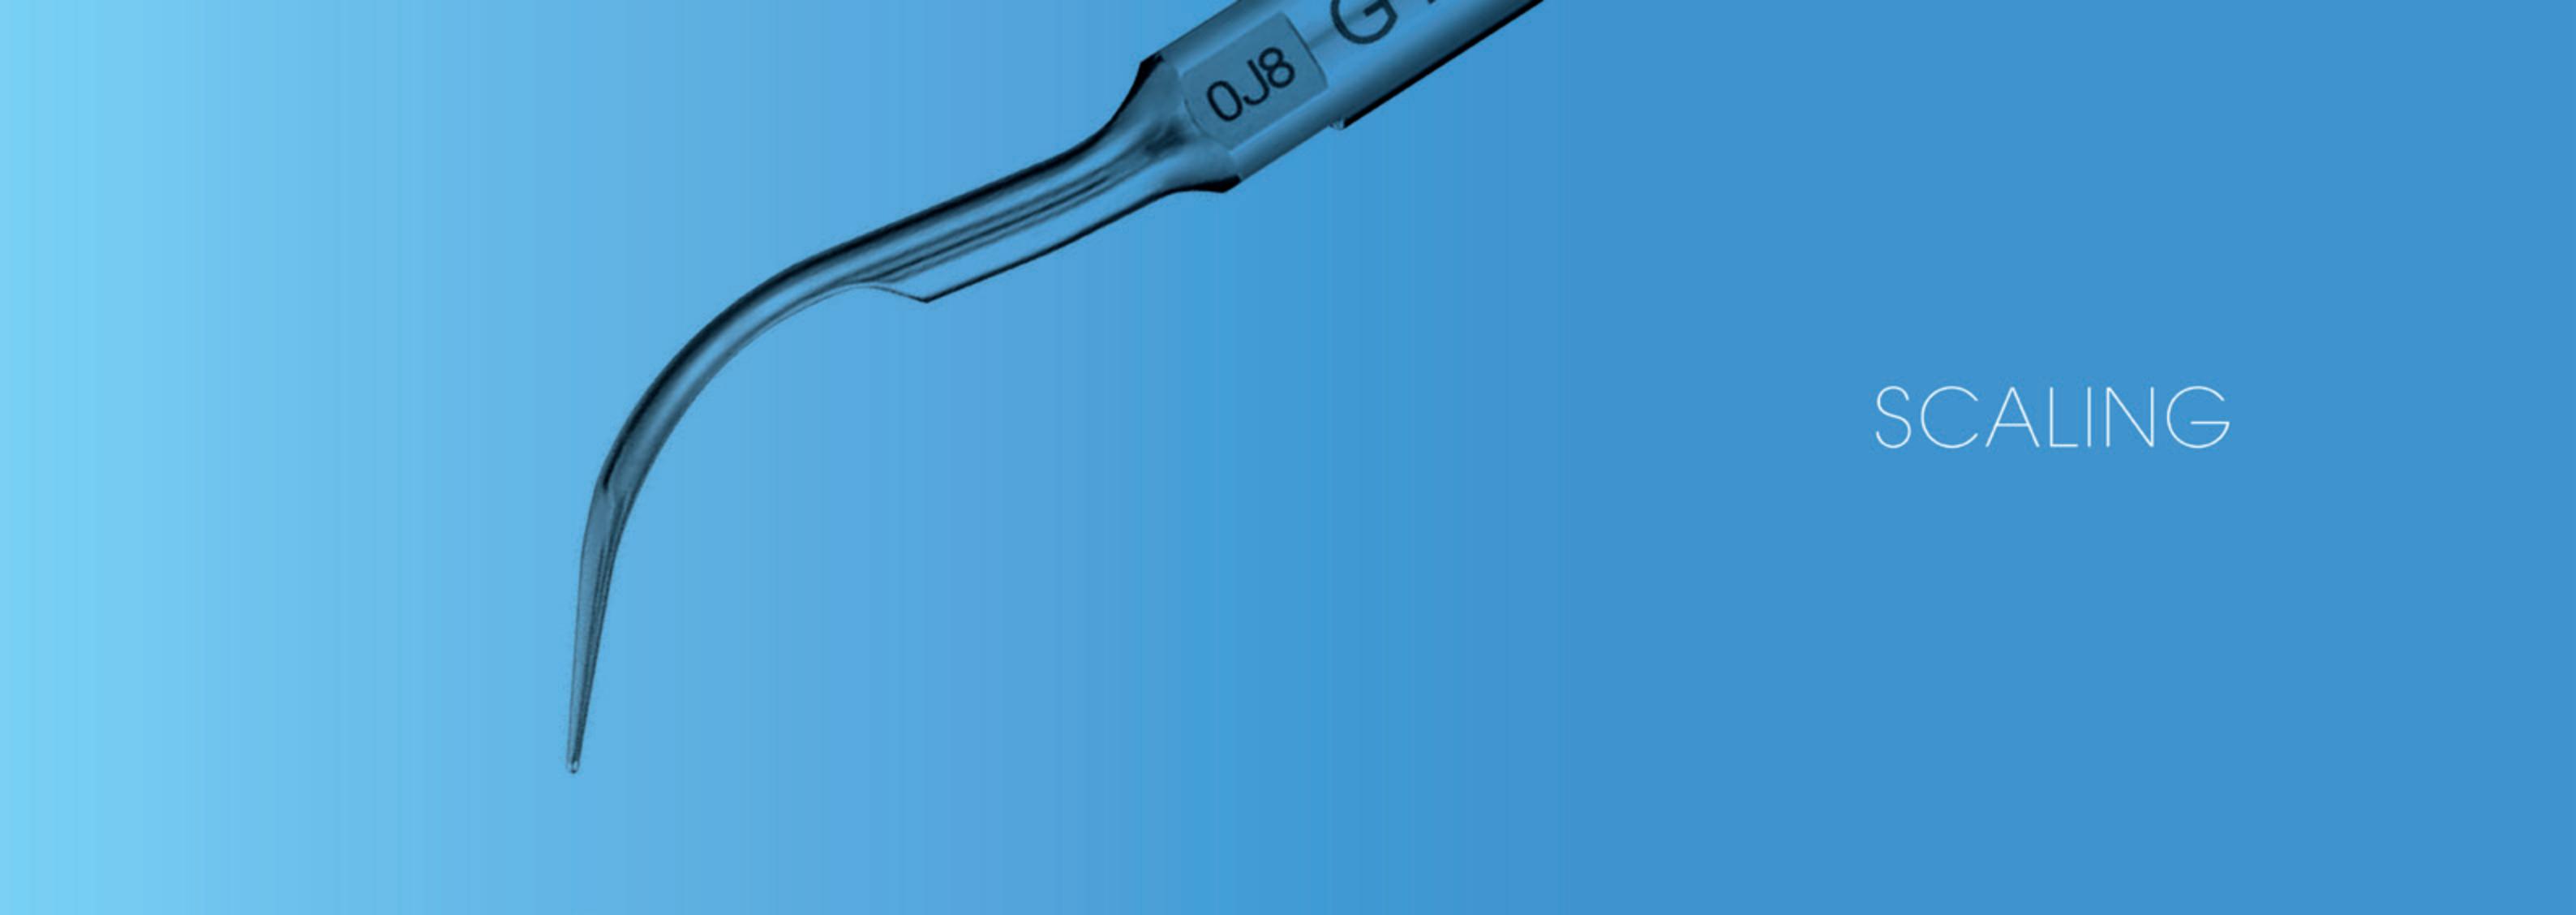

The force applied by the tip to the tooth should be feather-light. Using fine motions while keeping the end of the tip on the tooth surface makes the most of the ultrasonic vibrations. When removing large hard tartar, the end of the tip should be applied as this has sufficient power to "crack the tartar" by attacking where the tartar is attached to the tooth surface.

"Applying more force than is necessary" or "Applying force only to one spot on the tooth surface" may scratch the tooth surface, and subsequently cause pain to the patient. Doing so also means that you are not taking full advantage of the ultrasonic vibration.

4 Power setting

Power Setting adjustment is dependant on the condition of the oral cavity. We recommend restricting power use at the start of the procedure, gradually increasing it from low to meet the situation in the oral cavity.

MODEL V10

MODEL V-P10

For the maintenance of implants. Produced from special material to allow safe debridement without causing damage to implants.

NSK Satelec®
MODEL V10 ORDER CODE Z217041

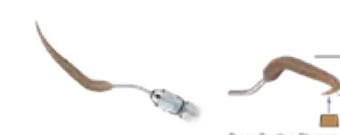

- Includes E-Tip replacement wrench
- * Plastic Tip is not included

MODEL V-P10 ORDER CODE Y900184

- * Pack of 3
- * V10 holder is not included

MODEL V-P11R

V-P11R/L left and right are double bent tips. This tip is extra long to easily access difficult to reach areas and to avoid interference with adjacent teeth or contours. Its shape was designed to best fit different tooth morphologies, making this a versatile tip for a wide range of uses from anterior teeth to premolars.

MODEL V-P11R ORDER CODE Y1002165

- * Pack of 3
- * Right curved type
- * V10 holder is not included

MODEL V-P11L ORDER CODE Y1002166

- * Pack of 3
- * Left curved type
- * V10 holder is not included

MODEL V-P12

V-P12 is a longer version of the popular V-P10 tip. It serves a wide range of applications, including the maintenance of implants and other prosthetic devices. Its shape offers easy access to all treatment areas.

MODEL V-P12 ORDER CODE Y1002167

- * Pack of 3
- * V10 holder is not included

MODEL V-P26R

V-P26R/L is a double-bent tips. The wide angles offer access to areas that cannot be reached with V-P11R/L tips or other conventional instruments. These tips are ideally suited to access the distal surfaces of molars and corner areas as, the end of the tip fits tooth morphology very closely.

MODEL V-P26R ORDER CODE Y1002168

- * Pack of 3
- * Right curved type
- * V10 holder is not included

MODEL V-P26L

MODEL V-P26L ORDER CODE Y1002169

- * Pack of 3
- * Left curved type
- * V10 holder is not included

Starter Kit

MODEL
Perio-Control Tips Starter Kit ORDER CODE Y1002606

- * V10 holder : 1 pc.
- * V-P11R, V-P11L, V-P12, V-P26R, V-P26L : 1 pc. each
- * Includes E-Tip replacement wrench

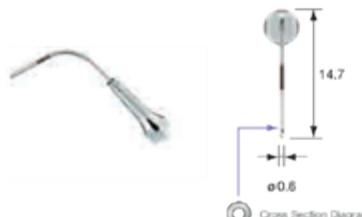

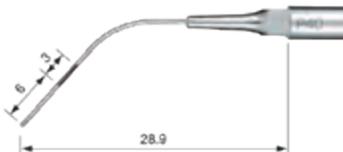

PERIO (Irrigation and Cleaning)

For effective cleaning following debridement or scaling. *No scaling effect.

MODEL P40

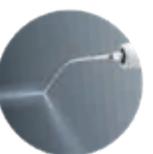

MODEL P41

- Safe to use regardless of the pocket condition due to the marking guideline of 3 mm from the position of 6 mm.

NSK Satelec® MODEL P40 ORDER CODE Z217550

- Tip diameter ø 0.6 mm

Dual irrigation points

- Irrigation from dual points on lateral areas of the apex.
- Effective cleaning regardless of the insertion angle.
- The rounded apex shape for safety in periodontium.

* Cross section diagram is the image of a point 1 mm from the end. The illustrated tip diagram is four times bigger than the actual size.

EXTRACTION

EXTRACTION

Periodontal membrane removal Tip.

MODEL G95

- Tooth extraction is possible without excessively cutting the alveolar bone around the remaining root, retaining the morphology of the alveolar bone.

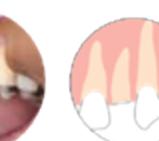

NSK MODEL G95

ORDER CODE Z217705

- TiN coating • 0.7mm thick • A double edge, which is sharp in three directions

Root extraction (upper left No. 2 tooth removal)

Impacted tooth (lower left No. 8 tooth removal)

Be careful not to apply excessive force,
as in cases of using elevators.

Refer to the power guide on pages 55-56.

* Cross section diagram is the image of a point 1 mm from the end.
The illustrated tip diagram is four times bigger than the actual size.

Caution

- Use of irrigation enhances performance.
- When used with Varios 970 choice of irrigation.
- Tip can be used on NSK ultrasonic units.

RESTORATIVE

RESTORATIVE

MODEL **G61D**

- Water not required

V-TIP SYSTEM

V-TIP SYSTEM

NSK Varios V-Tip holder system is innovative, multi-functional and economical.

The V-Tip holder is a separate component to the actual cutting tips and can be easily and inexpensively replaced.

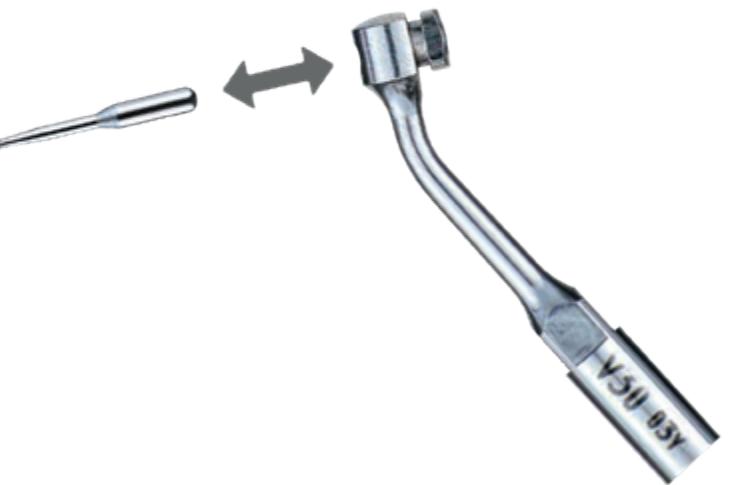

NSK V-Tip holder system offers the flexibility and expandability to meet the wide requirements for multi-purpose clinical applications.

3 Features

Safety

- Minimal damage to soft tissue
- Less risk of bleeding
- Cutting with ultrasonic instruments is minimally invasive

Economical

- One tip - Replaceable inserts
- Inserts are inexpensive

Ease of Use

- Small tip head guarantees excellent visibility
- Small head enables great access to distal sides of molar teeth and buccal area
- One tip meets the wide requirements of many clinical applications

Figures in the power guide indicate the appropriate power range and maximum power level for each tip. Do not exceed the maximum power level to avoid possible tip breakage.

Applicable power range for NSK Varios tips when used with NSK Varios and Varios2 ultrasonic scaler.

Varios2

Varios

<Caution>

- Always consult the operating manual and attached sheets before use.
- Always use with correct power mode and power range for each individual tip.
- Always use with sufficient irrigation to prevent excessive heat generation during treatment.
- Always start out with lower power setting and then adjust to higher setting if necessary.
- Always make sure that tips are securely tightened with the appropriate wrench and the power is set to and does not exceed the appropriate level before use.

*Incorrect operation may cause tip breakage even if tip is used within the recommended power range. Consult the operating manual before use.

Satelec® & P-Max are registered trademarks of Acteon SA, France. EMS®, Piezon & miniMaster are registered trademarks of Electro Medical Systems SA, Switzerland.

The Varios Tip Card

- Easy to use guide to assess tip wear

Ultrasonic scaler's tips wear through repeated use. Worn tips swing differently to new tips and do not perform as effectively. To check the condition of the tip, use the Varios Tip Card.

How to use the Varios Tip Card

1. Place the neck of the tip in the cut out.

2. Check wear of the tip.

3. See the green, yellow and red line to check wear of the tip

*See below what each color means.

At NSK we recommend to replace a tip when the tip meets the yellow line (wear of 1mm) to guarantee safe and effective use.

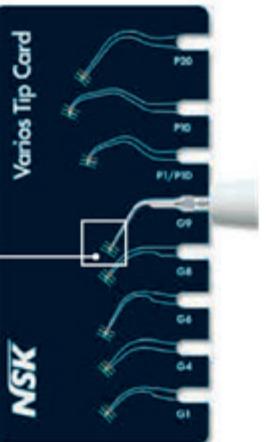

Green: No wear - Tip is OK
Tip replacement is not necessary

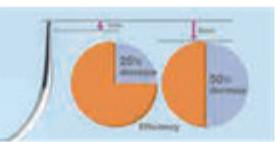

Yellow: Wear of 1mm - Tip is showing some wear
Tip replacement is recommended

Red: Wear of 2mm - Tip is badly worn
Tip replacement is necessary

*The Tip Card can be used to check the following tips : G1, G4, G6, G8, G9, P1/P1D, P10, and P20

Tip Replacement Wrench with Torque Limiter

For tips G1- G68D, G95, P1- P41, E15D, E30RD, E30LD, E31D, E32D and V-tip replaceable insets.
*Please tighten the tip until it clicks.

E Tip Replacement Wrench

For V10 (V-tip holder), tips E4,E4D,E5,E6,E7,E7D, E8, E8D, E11, E12 and the inserts of V30 (V-tip holder).
