

Your little sister will always be your little sister

Many dental practices still use autoclaves that are not suitable for handpieces.

To ensure you can safely and effectively sterilise your handpieces you need a grown-up autoclave.

NSK's market leading, grown-up autoclaves offer unrivalled performance, reliability and affordability and, unlike non-vacuum autoclaves, can sterilise handpieces.

See inside for details...

AFFORDABLE, RELIABLE & RAPID VACUUM STERILISATION

Covid-19 has forced a necessary re-evaluation of handpiece decontamination in today's dental practices. As a global leader in dental handpiece manufacture and decontamination, NSK SMART 3 Decontamination solutions let you focus on protecting your patients from the risk of transmission of harmful pathogens by improving the standard of handpiece reprocessing in the three crucial areas of cleaning, lubrication and sterilisation.

SAFER – compared with inconsistent manual processes and the frequent use of incorrect autoclaves / cycles*.

MEASURED – employing proven systems that dose the correct volumes of cleaning and lubricating solutions, handpieces can be sterilised using the correct autoclave/cycles – S or B type vacuum.

AFFORDABLE – ensures cost savings, both in terms of the decontamination equipment and consumables required, over-reliance on expensive inventory and the reduction in on-going maintenance costs for both handpieces and decontamination equipment.

REPRODUCIBLE – provides consistent results, time after time, by removing the ambiguities associated with manual processes and a hit or miss approach to sterilisation.

TIME SAVING – decreases the time required to decontaminate handpieces, helping improve throughput and reducing costly delays in the process and for downtime as a result of breakdowns.

PROTECT IT All-Inclusive Maintenance and Breakdown Contracts for NSK autoclaves from just £645pa.

NSK Autoclave contracts are designed to protect your investment. Our team of experienced engineers are professionally trained and qualified to provide the level of care required to keep your investment in tip-top condition. With nationwide coverage we can provide the level of cover that suits your requirements – call for details.

One annual maintenance visit or every 1500 cycles	Additional maintenance visit for units exceeding 1500 cycles	All service parts and service sundries included	All breakdown calls*
All breakdown parts including labour*	All engineer travel in the UK†	Free on-site operator training	Free technical software upgrades

iMax S

Reliable and rapid S type vacuum autoclave – all the benefits of a non-vacuum autoclave with the ability to sterilise handpieces correctly^[i].

- 18 min Flash cycle for unwrapped solid loads
- Rapid S type handpiece cycle in just 25 minutes
- The perfect upgrade for all non-vacuum autoclaves

Only £2,995
or **£3,345** with 2yr cover
& annual maintenance

Rent for just £115pm†

10 month interest-free finance available, subject to approval.

iClave plus

High performance B Type vacuum autoclave – enhanced sterilisation of all loads, in rapid time.

- 20 min Flash cycle for unwrapped loads including handpieces
- Fast 35 minute B Type cycle for all load types, including implant kits
- The tried and trusted choice for your next B type vacuum autoclave

Only £3,995
or **£4,345** with 2yr cover
& annual maintenance

Rent for just £155pm†

10 month interest-free finance available, subject to approval.

iCare

Automatically cleans and lubricates handpieces. In line with the NSK SMART³ decontamination protocol the iCare offers significant benefits over manual methods.

Only **£1,194**
Buy with any NSK autoclave
for just **£994**

Rent for just £26.50pm†

C2 Model shown. Compressed air connection required.

COPPER CHAMBER TECHNOLOGY IMPROVES PERFORMANCE, RELIABILITY AND AFFORDABILITY

- 18 litre high efficiency copper chamber improves total cycle times for faster throughput.
- Thermo-dynamic drying protects instruments from corrosion, discolouration and re-contamination.
- Helps extend the life of your rotary instruments, reducing the lifetime cost of handpiece repairs.
- Enhanced reliability and serviceability reduces your ongoing autoclave maintenance costs.
- Less repairs, longer lasting instruments, long term savings.

Learn more about the benefits of NSK Copper Chamber Technology

“The NSK iClave plus is a fantastic autoclave, as it has the perfect, 18 litre capacity and the instruments come out dry which is a real bonus that my nurse loves. We have worked with NSK for a number of years and their equipment and service are outstanding on every level.”

NEW Ti-Max Z95L

Speed Increasing Handpiece

Select between mist or only water jet at the flick of a switch with the world's first two way spray technology. When extra safety is needed the water jet provides maximum protection while still offering optimum cooling, then when conditions allow switching back to mist is a breeze. No equipment modification is needed, put the control back in your hands.
