Restorative - Electric

NLX nano

RETRO FITTED MICROMOTOR

Electric micromotors are the driving force behind speed increasing handpieces and can be fully integrated into the delivery system of most new and existing dental chairs. They can be retro fitted by an engineer or come as an option when buying new chairs. Controlling the specific speed and torque of micromotors within existing platforms is made easy thanks to built-in control pads.

Speed increasing contra-angles not only do everything a turbine does using the same FG burs, they provide a constant torque from the micromotor that does not decrease with resistance and higher load with no loss of power as they come in contact with the tooth.

Endodontics

NLZ E **NEW**

PORTABLE MICROMOTOR

Including reciprocating and rotary Endo features

NEW compact portable electric micromotor, for general & endodontic applications with contra angles (ie speed increasing/red band, 1:1 direct drive/blue band or speed reducing/green band).

- Lighter motor with enhanced power/torque
- Ideal for general (restorative, prophylaxis etc) and endo applications (rotary & reciprocating modes)
- Enhanced patient safety function indicates when the handpiece needs repair to minimise overheating
- Versatile installation options – portable or semi built-in

MODEL NLZ E
CODE Y1004004
RRP £3,250

The NLZ requires access to a plug socket, and the use of an existing Midwest hose from the cart to gain access to coolant water/air and the existing foot control.

INCLUDES NLZ Endo 6:1 CONTRA ANGLE (for rotary & reciprocating)
